

SL1000 Shearer Loader

The world's most powerful shearer loader, the Eickhoff SL1000, is specifically designed to enable peak performance in coal mines with extraction of seams having a height up to 7m.

But also mine operators with seams as low as 2.5m can profit from this machine due to its modular design principle, and by just changing some minor components, the 2x900kW cutting power can be installed in the lower seams as well.

Furthermore the Eickhoff SL1000 features maximum tunnel clearance underneath the machine body allowing even the biggest lumps to pass smoothly.

Early in 2007 the SL1000 was introduced to the world market with its first installation at Shenhua Energy/China.

The extensive experiences gained with the SL500 under Shenhua's hard cutting conditions guided the subsequent design of the SL1000 for up to 7m cutting height.

Thus even greater production rates were achieved with the Eickhoff SL1000 in operation.

Technical Details

Operating Range	2.7 - 7m (8.8'-22.9')
Voltage / Frequency	4160 V/60Hz
Total Installed Power	2590 kW
Cutting Drum Speed	29 - 41 rpm
Maximum Haulage Speed	40 m/min
Total Weight	110 - 155 t
